

random::random_weibull

```
graph LR; A[random::random_weibull] --> B[random::random_exponential]
```

A diagram showing a relationship between two random number generation functions. On the left, a gray rectangular box contains the text 'random::random_weibull'. A dark blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text 'random::random_exponential'. Both boxes have a thin black border.

random::random_exponential
